bd5: alignment to reference does not extend to 5′ end of reference

	CDS (single exon)	CDS (multi-exon)	mature peptide (MP#i)	CDS (made up of mature peptides)
No errors				bd5 (5′ boundary) alignment does not extend to 5′ boundary of reference				N/A

Example output from annotation script:

```
AY858050        2   MP#2    bd5   alignment to reference does not extend to 5'
                                  boundary of reference [10 nt from 5' end]
```
