

ntr: mature peptide is not translated because of upstream stop

	CDS (single exon)	CDS (multi-exon)	mature peptide (MP#i)	CDS (made up of mature peptides)
No errors				
ntr (not translated) mature peptide is not translated due to early stop 5' of predicted start	N/A	N/A		N/A

Example output from annotation script:

```
KC131141      11  MP#11  ntr  mature peptide is not translated because its CDS has an in-frame stop 5' of the mature
                        peptide's predicted start [early stop in mature peptide 10 ending at position 6274]
```
