

inp: CDS has at least one MP that is not identified

	CDS (single exon)	CDS (multi-exon)	mature peptide (MP#i)	CDS (made up of mature peptides)
No errors				
inp (interrupted prediction) CDS has at least one mature peptide that is not translated due to lack of prediction (nop)	N/A	N/A	N/A	

Example output from annotation script:

```
KC407671      16  CDS(MP)#1  inp  CDS comprised of mat_peptides is incomplete: at least one
                                primary mat_peptide is not identified (nop) [MP#1, MP#3]
```
